SAFE, EFFICIENT AND RELIABLE PUMPING SYSTEMS

**SEA WATER
LIFT PUMP**

CARGO PUMP

**FIRE WATER
PUMP**

**Why
Choose
Framo** ?

Framo pump technology holds incredible potential for the oil and gas industry, where leading installations are already profiting from its simplicity, safety, and cost-effectiveness.

The **Framo SE Seawater Lift Pump** is an electric submersible pump engineered to provide the best possible reliability, maintainability and availability. Its unique design incorporates solutions to common challenges faced by conventional submersible pumps:

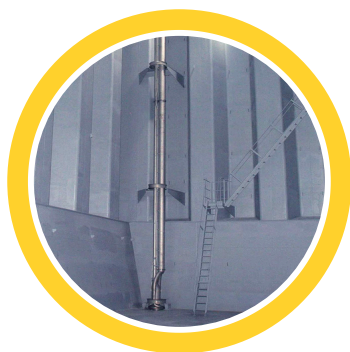

Fully Integrated Pump motor unit with short stiff shaft eliminates vibration issues

Cable-Free No cable handling during installation or the withdrawal of the pump

End Suction design always gives you the best possible NPSHa

No Flexible Coupling ensures you never have alignment issues

Easy Installation and Handling thanks to a compact, low-weight and cable-free design

The **Framo Cargo Pump** is a hydraulically powered vertical single-stage centrifugal pump designed for safe and efficient operation. Made from stainless steel with a smooth, easy-to-clean surface and minimal flanges, it ensures superior performance in pumping various liquids.

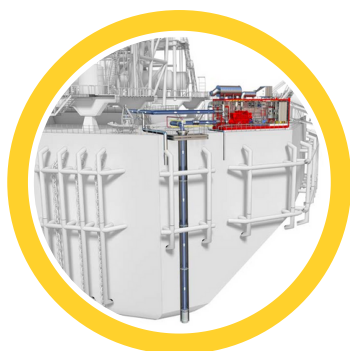

Reliable & Efficient: Hydraulically powered for smooth operation.

Durable: Stainless steel construction ensures corrosion resistance.

Easy Maintenance: Smooth design with minimal flanges prevents buildup.

Versatile: Handles a wide range of liquids efficiently.

Compact: Vertical design saves space in installations

The **Framo Hydraulic Fire Water Pumps** are designed for reliable and efficient fire protection in offshore platforms, FPSOs, and marine applications. These pumps are submerged, hydraulically driven, and self-priming, ensuring immediate and uninterrupted water supply in emergencies.

Instant Activation: Always ready for immediate response.

Self-Priming & Submerged: Ensures continuous operation without air lock.

Hydraulic Drive: No reliance on electric motors for higher reliability.

Compact Design: Saves deck space with direct seawater installation.

Durable & Corrosion-Resistant: Built for long-term use in harsh environments.

Low Maintenance: Robust design minimizes servicing needs and costs.
