THE ONBOARD WIRELESS CONNECTIVITY MESH NODE

Why
Choose
Scan Reach

SCAN REACH
Onboard Wireless Connectivity

ScanReach offers an onboard wireless connectivity (OWC) system that enables seamless integration of sensors, equipment, and personnel. This system supports real-time monitoring, machine diagnostics, fuel and emissions tracking, location management, cargo monitoring, and safety features. Designed for vessels, it provides a self-healing mesh network that's easy to install and fully encrypted, allowing for rapid digitalization and cost-effective data management. It is also certified by DNV.
